# L-BOSS Mobile App

An efficient, modern and productive application built with store associates in mind

L-BOSS Mobile is a new and improved mobile technology with a fresh new look and an improved user interface that is easy to use. L-BOSS Mobile features new and improved developments and enhancements from the current unit, giving you a brand new user experience.

## Key Features:

Advanced product management

Promotes efficiency

Improves customer

Experience on store floors

# What can L-BOSS Mobile do for YOU?

L-BOSS Mobile brings newer and better solutions to you, with the WOW factor built right in. Our new and improved interface with exciting features are completely intuitive and require minimal end-user training. With our highly competitive pricing, L-BOSS Mobile has been priced to sell and help to fulfill the demands of the new normal in retail.

## Benefits and Opportunities

L-BOSS Mobile is not just an upgrade, but a distinct product with its own pricing structure. You can benefit from migrating from a simple and limited web-based tool (L-HTML) to a full-fledged mobile app package that can be run on modern devices.

The interface can be run by you in a dedicated app which will also require a wireless unit capable of real-time TCP/IP communications with the L-BOSS server.

### Phases of Release:

Phase 1: [Android](#)

Phase 2: [iOS](#), and [UWP \(Universal Windows Platform\)](#)

# Helping Your Business

L-BOSS Mobile can help run your business successfully by ensuring customers are served effectively and employees are working efficiently. With a focus on line busting, product management, inventory counting, PO's & price labeling, we aim to provide the best tools you adapt to the digital-focused future. This revolutionary mobile application can also help with providing secure, high performing and scalable mobile solutions to run smoothly today and support your future business needs with confidence.
