Logi Omnichannel

Integrates with

a leading online
e-commerce
solution

Go beyond traditional brick-and-mortar shopping and give your customers a unified experience across all channels and touch points.

Logi Omnichannel transforms retail operations, empowers purchase processes, and creates dynamic customer experiences.

Integrate your online store with your physical Logivision POS

Logi Omnichannel Features

- Outbound features designed to enhance your customer and store visitor experience:
- Product UPC or PLU
- Add Universal Product Code and Price Look up code
- Product description
- Sell more products online by including a complete description
- Product price
- Showcase prices with different variants
- Product weight
- Indicate product weight to provide more clarity for your customers
- Inventory on-hand value
- Tell your customer how much inventory you have left so they can make timely buying decisions
- Tax status
- Inform customers in the store about applicable taxes applied
- Subdepartments and departments sent as collections
- Inbound features that add efficiency for you at the back end:
- Import fulfilled orders (including discounts and shipping fees) as sales
- Fulfilled orders indicated in total sales at the back end

Multi-Store Support

- Logivision supports overall operations for retailers with multiple store locations

Upcoming enhancements:

New features are currently in development and will be added in near future:

- **Additional web store support (WooCommerce via Octopus)**
Research indicates that over 40% of all websites are built on WordPress. We will be connecting WooCommerce with Logivision POS to support all WooCommerce users.
- **New web store platforms coming soon**

Minimum software requirements

L-BOSS 5.0.17
